

WorkTime Helps Decreasing Use of Social Network Websites

“The most helpful WorkTime report Top Facebook Employees helped us increasing employees’ awareness. Social websites use dropped significantly.” – says the company’s manager

Industry
Health Care

Country
USA

Size
5,000 Employees, 100 Citrix Servers

Issue/Challenge
Minimize Social Network Websites Use

Solution
WorkTime Corporate

Result
Use of Social Network Websites Decreased

OVERVIEW

It is more than 2 years as one of the largest USA Health Care Organizations has been successfully monitoring employees’ performance with the help of WorkTime. The main purpose of monitoring is to minimize personal computer use and increase employees’ productivity level.

The Organization:

Health Care Organization, USA

Amount of monitored employees/workstations: 5,000

Amount of Citrix servers: 100

CHALLENGE

Very often big companies with thousands of employees face such situation: in case employees waste their working time, it turns into significant money waste. Even if overall performance of the whole company looks good enough, it is still a significant amount of money that is being lost even if every employee is doing personal activities for about 30 minutes per day.

SOLUTION

WorkTime was successfully applied as a solution for this big health care organization. After installing WorkTime, it was discovered that almost 5% of entire employees’ time was spent on Social Networking (Facebook, Twitter, Google+). One of the mostly used weekly reports was “Top 5 Facebook Users”. All the employees were given an opportunity to see this report every week, and it affected performance level by significantly improving it.

RESULT

After WorkTime installation it was discovered that almost 5% of entire employees’ time was spent on Social Networking (Facebook, Twitter, Google+). And in this case 5% is equal to 250 employees’ salaries, which means that **250 salaries were paid for nothing**. And as all the employees were informed about monitoring, performance level was drastically improved and company’s **money was saved**.

ABOUT WorkTime

WorkTime is a computer monitoring software, which is intended for employees’ performance and productivity monitoring.
