

# WorkTime Saves Thousands Dollars When Moving to New Citrix Servers

<b>Industry</b>	Manufacturing
<b>Country</b>	Australia
<b>Size</b>	1,200 Employees
<b>Issue/Challenge</b>	Identifying Unused Licensed Software
<b>Solution</b>	WorkTime Corporate
<b>Result</b>	Money Saved

## CHALLENGE

A construction material and lime producing company made a decision to buy new Citrix servers instead of the existing ones.

Amount of Citrix servers: ~100.

Amount of Employees that are using servers: 1,200.

### The process of Moving Involves

- Engaging contractor employees;
- Buying new Citrix servers;
- Buying service for new Citrix servers;
- Moving software (licensed and free) to new servers.

### Financial Side

Financially this decision involves many different expenses:

- Purchasing new Citrix servers;
- Purchasing service for new Citrix servers;
- **Purchasing licenses for licensed software;**
- **Installing free software;**
- Paying contractors for performing the task;
- Loses due to downtime periods.

Financially this task is quite a responsibility and also it is quite a challenging workwise. In other words, it is a big task for the company, as one physical Citrix server costs about \$20,000, plus other expenses, also this process might cause a significant downtime to 1,200 employees.

And if it was decided to proceed with this upgrade, it should be done as optimal as possible.

## THE USE

WorkTime was installed in advance and worked for a while collecting all the required information. Also, because software usage monitoring is not the only function that WorkTime offers (the main purpose of WorkTime is Employee Productivity Monitoring, Computer Use Monitoring), the company continued using WorkTime after moving to new Citrix servers to see how exactly employees use those servers at their working time hours.

## ABOUT WorkTime

WorkTime is a productivity computer monitoring software intended for performance and productivity monitoring. WorkTime offers respectful productivity monitoring without infringing on personal privacy.

## TASK TO SOLVE

In order not to overload new servers with unnecessary software and not to buy/extend unnecessary software licenses (to save on software licenses) the company decided to find out what software is not used or is rarely used by the employees.

## QUESTION: What Licensed Software Should be Installed on New Citrix Servers? What software is actually being used?

Here is a task the company's got to answer: Find-out what software is really used, used rarely or not used at all.

## MONEY SAVING SOLUTION

WorkTime® Corporate computer monitoring software was the successful solution for the above task. WorkTime® Corporate monitors software usage and shows the real picture of the software used. Also the cost of 1,200 WorkTime licenses is a very small portion of the whole process, so the company found it beneficial to use WorkTime.

## ABOUT NesterSoft Inc.

NesterSoft Inc. is a provider of productivity monitoring software. The company is specializing in noninvasive and respectful productivity monitoring for more than 15 years, since the year of 1998.
