WORKTIME®
Employee & Computer Monitoring

Attendance Monitoring

Reduces Insufficient Working Time
Improves Attendance

WorkTime® is a solution to monitor employees' attendance. The software records computer use per day for every employee. WorkTime reports show late arrivals, early leavings, insufficient working time and overtimes. WorkTime is being successfully used by many companies as a stand-alone attendance monitoring solution or as an addition to the existing check-in systems.

Idle & Active Times Monitoring

Reduces Idle Times
Increases Work Process Efficiency

WorkTime records employees'/computers' idle & active times. WorkTime reports show when and for how long employees and computers are idle or active. This information is very helpful for boosting employees' productivity as well as for optimizing computers use. E.g. *Top Idle Time Employees* report decreases idle times by the employees.

Internet Browsing Monitoring

Reduces Personal Internet Usage
Increases Time for Business Needs

WorkTime monitors visited web-sites and URLs on every computer by every employee. WorkTime reports display how much time was spent on personal Internet activities, including chatting on Facebook, reading news, shopping, looking for a new job etc. One of the most demanded WorkTime reports shows top Facebook users.

Software Use Monitoring

Reduces Personal Software Use
Saves Moneys on Licensed Software

WorkTime records software use. Besides of increasing software use for business needs, WorkTime helps with saving money on licensed software. Many WorkTime customers report thousands of dollars savings after inspecting the actual software use in their companies. They report results as really unexpected and impressive.
