Employee performance has increased by 40% since implementing WorkTime!

Country: USA

Industry: Insurance

Size: 5,000 employees

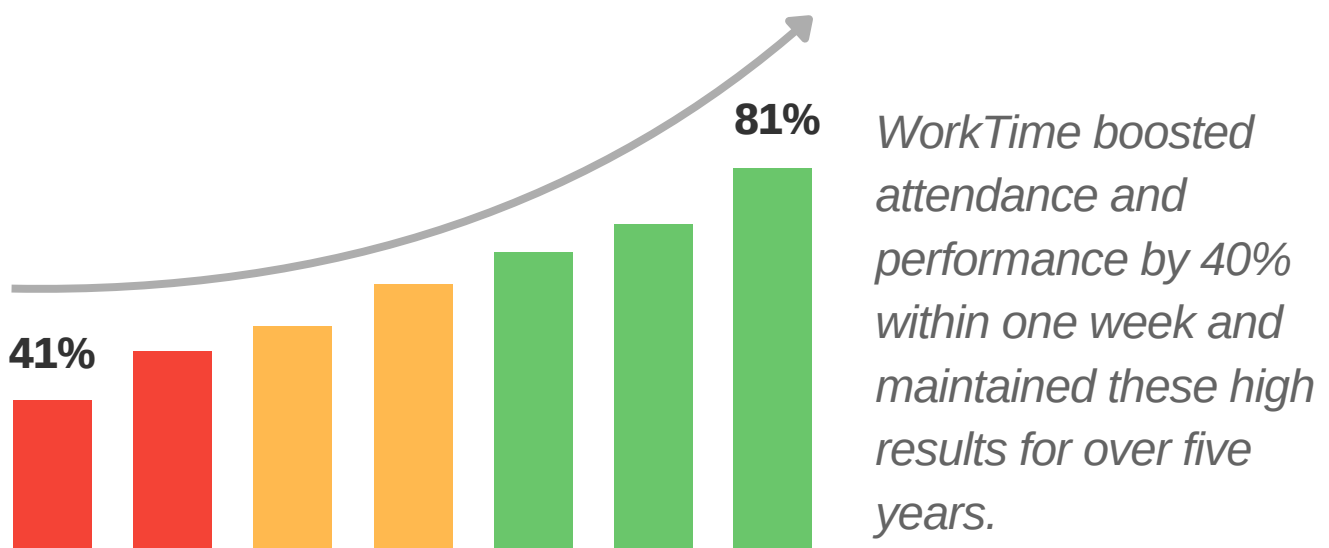

The challenge: A leading U.S. insurance company was struggling to keep employee attendance and performance consistently high. The CEO needed an effective, low-effort solution to optimize workforce performance.

The solution: WorkTime On-Premise, a non-invasive, transparent employee monitoring.

The results: +40% increase in employee performance and attendance within one week. Long-term success: metrics have remained high (81%) for 5+ years. Better self-management reported by department heads From 39% to 81% - a lasting transformation.

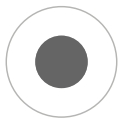

Why it worked:  Non-invasive, transparent monitoring, 70+ clear reports, immediate insights.

Work-from-home productivity jumped from 30-40% to 86%

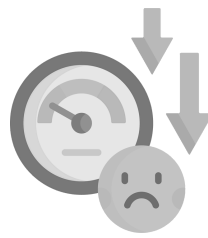

Country: UK-Japan

Industry: Banking

Size: 170 employees

The challenge: After switching to remote work during COVID, the bank's customer service productivity and response times dropped. Unlike in the office, managers couldn't tell if employees were truly active or just away from their computers.

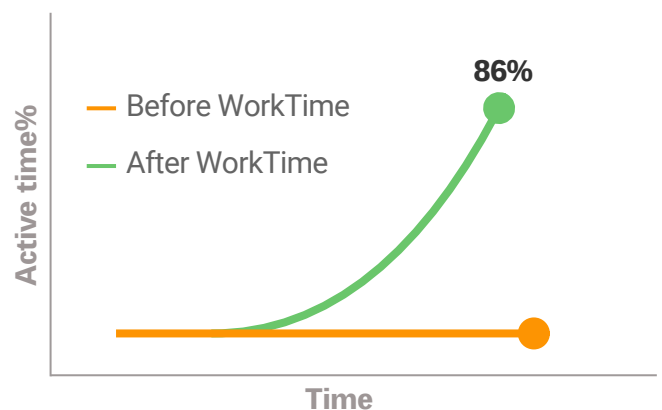

The solution: WorkTime computer active time monitoring software.

GDPR UK: The company uses the WorkTime On-premise edition to ensure GDPR compliance in the UK.

The results: Employee computer active time increased instantly from 30-40% to 86%!

WorkTime boosted active time from 40% to 86% - with full privacy and GDPR compliance.

Why it worked: Privacy-respecting,  non-invasive monitoring; GDPR-compliant; active vs. idle time reports.

From struggling to thriving: WorkTime lifted productivity to 95%

Country: South Africa

Industry: Telecommunications

Size: 20+ employees

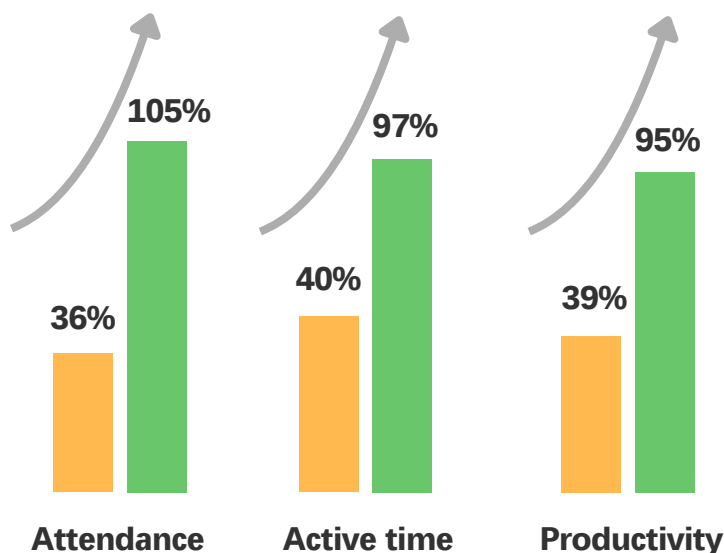

The challenge: Employees getting disengaged and the management gets overloaded.

The solution: WorkTime Cloud

The results: The initial productivity percentage was about 40%, and now it reaches 95%! Clear KPIs provided by WorkTime are keeping employees engaged, and overall employee performance is now very high. Problematic team members are now more visible, and each team member is very clear about the KPI expectations.

*2+ years of success!
This telecommunication
company doubled its
performance!*

Why it worked:  Non-invasive, feature-rich, great tool for employee engagement.

PRODUCTIVITY
& RESPONSIBILITY
BOOSTED!

WorkTime boosts accountability and performance month by month

Country: South Africa

Industry: Financial services

Size: 200 employees

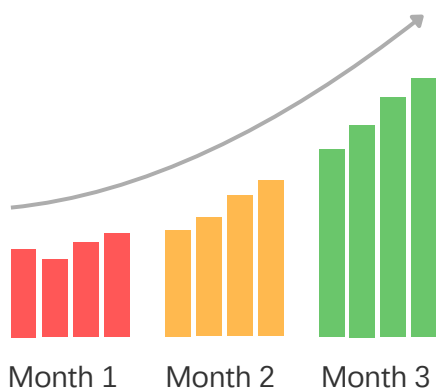

The challenge: Management wanted to boost employee responsibility, ensure remote work was genuine, and verify overtime claims.

The solution: WorkTime Cloud

The results: According to IT manager Karin R., since implementation, there has been a monthly increase in productivity. Staff can now manage themselves and take responsibility for their own productivity.

WorkTime drove monthly productivity growth by empowering employees with their own reports.

Why it worked: Easy setup, accurate data, and employee access to reports.

Saved thousands during migration to new Citrix servers

SAVED MONEY
ON UNUSED SOFTWARE

Country: Australia

Industry: Manufacturing

Size: 1,200 employees

The challenge: Before migrating 1,200 employees to 100 new Citrix servers, the company needed to identify unused software to avoid unnecessary license costs and server overload - while minimizing downtime and maximizing ROI.

The solution: WorkTime

The result: Money saved.

WORKTIME  SAVINGS

WorkTime helped save thousands by identifying unused software before moving 1,200 employees to 100 new Citrix servers.

Why it worked: Clear, accurate data on software usage while respecting employee privacy.

SAVED THOUSANDS
ON UNUSED SOFTWARE

WorkTime helped U.S. school board save money & boost education

Country: USA

Industry: Education

Size: 3,000 employees

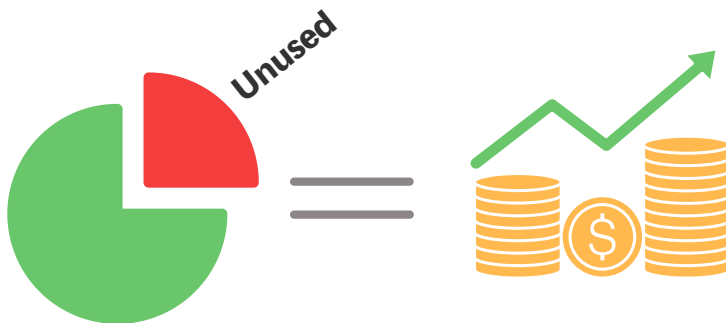

The challenge: The school board invested in costly educational software to support learning. But soon, a pressing question emerged - was it actually being used?

The solution: WorkTime Cloud

The results: The school board was shocked to discover that much of the costly software had been barely used. The outcome is outstanding - money has been saved and the educational process improved.

WorkTime uncovered unused software. Money saved, educational process improved!

Why it worked: Seamless installation, detailed usage reports, custom tags, and accurate monitoring.

JOB SEARCH DETECTED.
RESIGNATION PREVENTED.

WorkTime prevented the loss of a key developer

Country: USA

Industry: IT

Size: 100 employees

The challenge: A remote software developer with unique skills began job searching, as noted in the WorkTime Job search report. Other WorkTime reports also indicated that the employee was preparing to quit.

The solution: WorkTime Cloud

The results: Based on WorkTime input, the IT manager, Timothy G., had a conversation with the employee, which led to the employee staying with the company.

Early warning signs detected by WorkTime

Overtime

Job Search

WorkTime revealed early signs of burnout and job searching. That insight helped retain a key developer.

Why it worked:  non-invasive monitoring and scheduled reports with insights into attendance, overtime, job search, and burnout.
